EDUCATION

UNIPÊ

João Pessoa, Brazil

CST in Web Systems

Feb 2024 - Dec 2025 (in progress)

EXPERIENCE

Back-End Developer

In progress

Plush - Real-time Chat

Remote

- Led back-end development in a team of 5 developers
- Implemented JWT authentication with server-side cookies for enhanced security
- Built real-time communication system using WebSockets
- Designed a normalized relational database with indexes for performance optimization
- Structured the project using SOLID principles and layered architecture

Back-End Developer

In progress

Task Board API

Remote

- Inspired by tools like Jira and Trello
- Implemented role-based authentication and authorization
- Designed database for managing tasks, projects, and users

Back-End Developer

Completed

NLW Connect - Event API

 \overline{Remote}

- Developed during a Rocketseat event
 - Created event registration and sign-up system
 - Used Redis for performance caching
 - Wrote complex queries with Drizzle Kit

Back-End Developer

Completed

AWS Lambda with Java

Remote

- Built serverless functions with Java 17
- Integrated with AWS services: S3 and API Gateway

Projects

Plush - Real-time Chat | Node.js, WebSockets, PostgreSQL, JWT

In progress

- Led back-end development for a real-time chat application
- Implemented secure JWT authentication with server-side cookies
- Designed a normalized relational database with performance optimization
- Applied SOLID principles and layered architecture

Task Board API | Node.js, Express, PostgreSQL

In progress

- Developed a task management API inspired by Jira and Trello
- Implemented role-based authentication and authorization
- Designed database schema for tasks, projects, and users

NLW Connect - Event API | Node.js, Redis, Drizzle Kit

Completed

- Built an event registration and sign-up system
- Utilized Redis for caching to improve performance
- Wrote complex database queries using Drizzle Kit

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Java

Frameworks: Node.js, Express, Fastify, Spring Boot, Spring Data JPA

Testing: Jest

Databases: PostgreSQL, MySQL, MongoDB, Redis

ORMs: Drizzle Kit, Knex.js

DevOps/Cloud: Docker, AWS (Lambda, S3, API Gateway), Azure

Architecture: SOLID, Layered Architecture, REST APIs, Microservices, WebSockets
